

PROJECT VIVA / SMART MOBILITY

College Bus Tracking System

Smart, Safe & Real-Time Campus Transportation

STUDENT NAME · DEPARTMENT
COLLEGE NAME · GUIDE NAME
ACADEMIC YEAR

One live location. Everyone informed.

A GPS-enabled platform that turns every college bus into a real-time, visible and connected service.

- 01

Real-time tracking
- 02

Safer journeys
- 03

Instant communication
- 04

Everyday convenience

Traditional transport runs on uncertainty.

Without live data, every delay becomes a student experience problem—and an operational blind spot.

01

Unknown bus location

02

Unclear arrival times

03

Long stop waiting

04

Multiple-bus complexity

05

No real-time updates

06

Slow emergency response

A connected mobility ecosystem.

One shared data layer connects buses, students, drivers and transport administrators.

Designed around six outcomes.

01 Live bus location	02 Reduced waiting time	03 Safer transportation
04 Reliable ETA	05 Fleet monitoring	06 Connected communication

From moving bus to moving dot—in seconds.

GPS → INTERNET → BACKEND → REAL-TIME CHANNEL → USER INTERFACES

Modular, real-time and scalable.

Everything needed for a confident commute.

01	Live GPS Tracking	02	Real-Time ETA	03	Routes & Stops
04	Bus Schedule	05	Push Notifications	06	Driver Information
07	Admin Dashboard	08	Emergency / SOS	09	Multi-Bus Monitoring

The commute, in the palm of your hand.

Live location
Nearby stops
Safety alerts
Instant route updates

A clear map-first interface removes guesswork from every trip.

Fleet intelligence at a glance.

ROUTES & DRIVERS

- B2 Bus 07 • Active
- C1 Bus 12 • Delayed
- A4 Bus 03 • Active
- D7 Bus 18 • Offline

Flexible choices. Clear layers.

FRONTEND**HTML · CSS · JavaScript · React****MOBILE****Android · Flutter · React Native****BACKEND****Node.js · Python · Java****DATABASE****MySQL · Firebase · MongoDB****LOCATION****GPS · Google Maps · OpenStreetMap****COMMUNICATION****REST API · WebSocket · Firebase Notifications**

One system. Three kinds of impact.

STUDENTS

Less waiting time
Better travel planning
Live location updates
Safety notifications

COLLEGE MANAGEMENT

Efficient fleet monitoring
Improved route planning
Operational visibility
Faster decisions

DRIVERS

Route guidance
Better communication
Emergency support
Clearer schedules

From tracking to intelligent mobility.

01 AI arrival prediction	02 Traffic-aware routing	03 QR / RFID attendance	04 Predictive maintenance
05 Transport chatbot	06 Voice-activated tracking	07 Location-smart alerts	08 College ERP integration

CONCLUSION / THANK YOU

Track Smart. Travel Safe. Arrive on Time.

College Bus Tracking System transforms campus transportation into a smart, connected, safe and efficient service.
